nice game, good idea.. Island Tribe is a time management game, where you assign one or more villagers to one task after another, either picking up a resource (wood, stone, water, wool, honey, milk, etc.), building or repairing a structure using these resources, or shooing away a wild animal with food resources. The map starts in a fog, and is gradually uncovered as you move along the paths, completing tasks. Each level has different end goals, and there are approximately 40 levels. There is a time limit, but nothing happens if it runs out, beyond losing a score bonus, and all but the end levels are too easy to worry about anyway.

I would describe this as an overly easy time management game for people who hate time management games.. Game Information

Island Tribe is a *Strategy game that was developed by Realore Studios and published by Qumaron.*

Game Visuals

I want to mentioned that the visuals in the game is well done. The visuals can be adjusted in the game's option menu.

Game Audio

I want to mentioned that audio for the game is well done. Even though the audio is somewhat simplistic and repetitive. The audio can be adjusted in the game's option menu as well.

Gameplay

This is a time strategy game, where careful planning is required, due to limited amount of resources that are available.

There are three different difficulty game modes to choose from: Normal; Multi-task; Relaxed. The difference between these difficulty game modes are: Timer Speed and Scoring. The normal mode, the timer speed and scoring is low. The multi-task mode, the timer speed and scoring are moderately high. The relaxed mode, the timer speed is frozen and scoring is moderately high.

There are three different chapters with thirty level in total. All levels can be replayed for better scoring and star rating.

All levels has three star rating system. The stars are earned from playing the game. The star rating system represents how fast the levels has been completed. Three Stars (Gold;) Two Stars (Silver;) One Star (Bronze.) There is an opportunity to replay levels for better star rating.

There are several different special power ups to help complete the level faster. These special bonus power ups comes with a time limit. But they can be used again after they have been recharged overtime.

There are twenty-three sets different achievements that can be unlocked from playing the game. Each of these achievements does come with some requirements that needs to be completed before they can be unlocked. These achievements are in-game only.

Miscellaneous

Final thoughts: I have found the game enjoyable to a certain extent. The replay value for the game is low. I would recommend this game, but not at the game's full price value.
